DETAILED ACTION

The filing of a request for continued examination RCE is noted.

The substitute specification filed 11-10-2005 has been entered.

Claims 1-5 and 8-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Germany 801 in view of Minds, Wu and Nagata.

See last office action . Nagata fig 9 45 shield is applied and includes members 45a formed on opposing edges of the shield that cover the housing front face and prevent the shutter from coming out.. Obvious to use such shield in Germany for EMI protection and to retain shield , same results obtained in the Nagata device. Dependent claims, listed above, not seen to be separately at issue

Applicant's arguments filed with the amendment have been fully considered but they are not persuasive. The arguments do not refer to the Nagata shield 45 as applied above therefor are ineffective to overcome the rejection.

Claim 10 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is an examiner's statement of reasons for allowance: The rejection of claim 10 as set forth in the last office action would require multiple modifications to the Brickett device and would amount to an unobvious redesign of that device.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
